**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, drawn to a method for immobilizing a protein to a solid-phase.

Group II, claim(s) 12, drawn to a method for quantitative determination of a protein.

Group III, claim(s) 13, drawn to a method for immunoblotting.

Group IV, claim(s) 14-21 and 23, drawn to a method for detecting an abnormal prion protein.

Group V, claim(s) 22, drawn to a process.

Group VI, claim(s) 24-31, drawn to a reagent solution.

Group VII, claim(s) 32-34, drawn to a kit.

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The common technical feature linking all of the groups is the "presence of a lower alcohol, and a halogenocarboxylic acid and/or a long chain alkyl sulfate," as recited in claim 1. This limitation, however, is taught by the prior art. See, for example, page 341 of Karkhanis

Art Unit: 1641

(Analytical Letters, vol. 22, no. 2, pp. 339-351 (1989)), supplied by Applicants on July 23, 2008. Karkhanis teaches that a protein was fixed in a gel by a solution comprising methanol and 10% trichloroacetic acid. Accordingly, the common technical feature is not a special technical feature over the prior art. Consequently, unity of invention between the groups is lacking.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
